MEMMOREX

4300
Peripherals

Introducing the Galaxy Program. Full-Line Support from Memorex.

There's now a choice in the 4300 world. A full line of quality peripherals that are plug-compatible with IBM's best.

Configure the total subsystem you need. We've got large-capacity DASD, high performance tape drives, durable printers, flexible communications products and quality media.

And we'll work hand in hand with you. To help you select what's right for you. To help you obtain it—through the Memorex Finance Corporation. And to support you once the equipment is in place. Above all, we're a real alternative. Because we're an established supplier with more than twenty years' of proven experience in the data processing world. We're Memorex.®

2078 Display Station

Choice of amber or green phosphor displays, low-profile or ergonomic keyboards, tilt and swivel glare-free screen, automatic dimming, line and column indicator. Functionally interchangeable with the IBM 3278 and 3178 display stations.

2079 Display Station

Has all the energy savings, ergonomic features of the 2078 plus the added advantage of seven color capability. Eliminates the need for convergence routines, and has graphics available. Functionally interchangeable with IBM 3279 display stations.

2178 Display Station

Compact, cost-effective display with modular design, adjustable keyboard, and space-saving, 12-inch screen. Offers the ergonomic display features of 2078 and 2079 display stations. A plug-compatible replacement for the IBM 3178 display station.

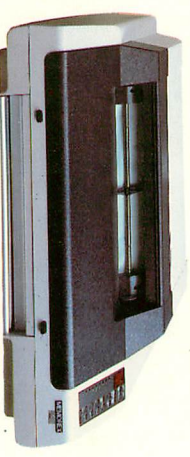

2074 Cluster Controller

Both local and remote models control the operations of up to 32 devices in SNA/SDLC environments. Can be configured in just a few minutes, and offers extensive self-diagnostics. Functionally equivalent to the IBM 3274 Cluster Controller.

2076 Controller

Handles up to eight Category A peripherals. Operates at speeds up to 9600 bps in the BSC environment. Lightweight and compact to fit in any work area.

2068 Multifunction Printer

Provides both high speed dot matrix (350 cps) and near-letter quality (80 cps) functions; features long-life ribbon, quiet operation and patented printhead that actually runs cooler at high speed. Interchangeable with IBM 3268 printer.
