

 **MEMOREX**

Memorex Technologies, Inc. 

COMPANY PHILOSOPHY

Memorex Technologies, Inc. (MTI) is dedicated to providing the most advanced products with the highest possible level of reliability and quality to assure total customer satisfaction.

MTI's strengths lie in its technology leadership, product superiority, management experience and, most importantly, its loyal customers.

In the process, the benefits of Memorex Technologies' dynamic growth will be shared with its customers, its shareholders, its employees and the community.

PRESIDENT'S MESSAGE

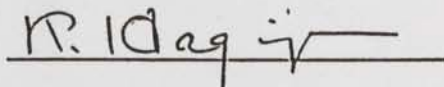

As we approach the 21st century, we are part of a highly integrated information-oriented society both in business and in the home. In order to contribute to this tide of innovation, Memorex Technologies, Inc. (MTI) is enhancing its ability to meet our customers' needs.

Based in Santa Clara, California, the Memorex Tape Plant has supplied storage media products to the Memorex worldwide market for over 30 years.

Since its establishment as an independent company on July 1, 1990, MTI has made aggressive investments to develop new products and to assure continued improvement of our product quality. While the Tape Plant utilizes highly advanced technologies and integrated production capabilities, recent investments in modernization have included steps towards automation of production. In this way, we can ensure we remain a strong company in today's environment and can contribute to our community.

As a member of the Memorex Telex Group, MTI continues to provide products to worldwide customers through Memorex Computer Supplies. To meet this goal, MTI will continue to develop and provide new business opportunities and products which will enrich and add value to the community as a whole.

Through these measures, I accept and look forward to the challenges of the 21st century and commit MTI to its pursuit of continued customer satisfaction and community enrichment.

Kazuaki Hagiya
President

MTI COMMITMENT TO USER APPLICATIONS

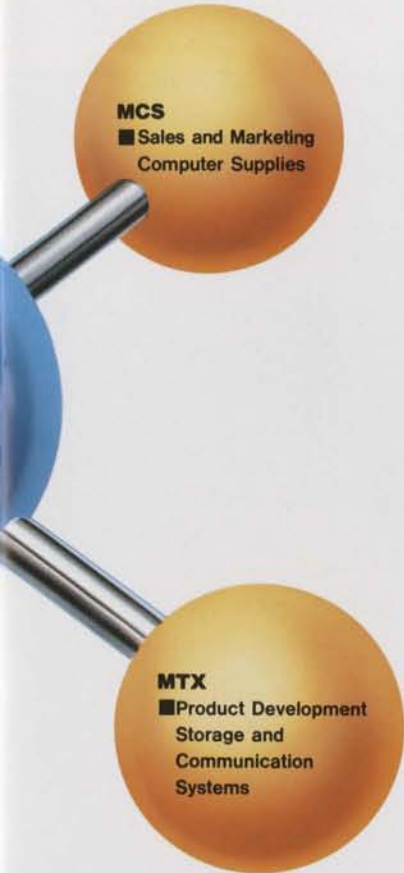

Today, MTI's core business stems from the manufacturing of magnetic storage products. Our superior technology in the manufacturing of these products is based on over 30 years of media production excellence.

MTI has a long-established track record in responding to and in delivering end-user requirements. We have extensive proven technical expertise in the area of coating technology, critical to the manufacturing of storage media products. These coatings... which include usage of gamma ferric oxide, chromium dioxide, barium ferrite, and metal particles... are looked upon by customers in the computer and instrumentation tape market as critical elements to our products' long-term performance and reliability.

With this advanced technology, MTI will continually improve our products to satisfy current end user applications. We are further committed to responding to our customers' requests for new products to meet future storage media needs worldwide.

MTI is environmentally conscious and has taken actions to safeguard our environment and customers. MTI has diligently researched and has completed the necessary investment in upgrading our environmental equipment to exceed all requirements by U.S. and Local governmental regulatory agencies.

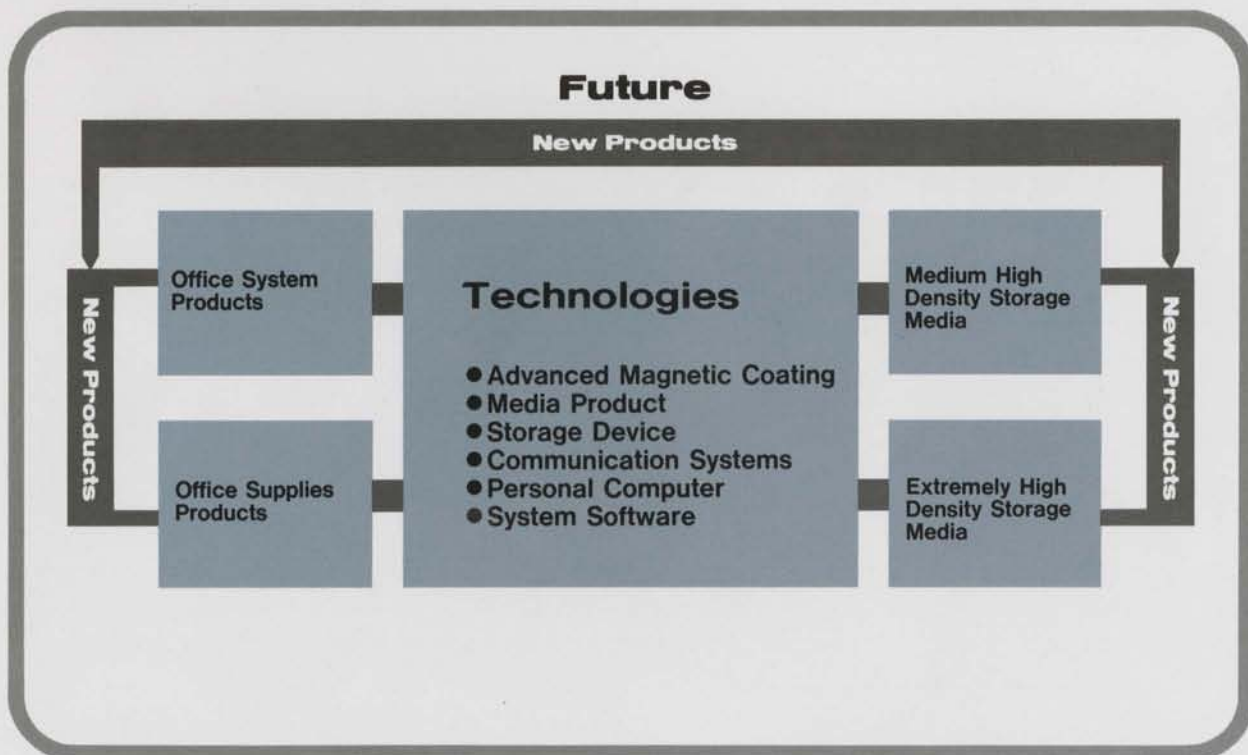

LINKED TECHNOLOGIES

MTI adds to its strengths in advanced technologies and product development through direct cooperation with both Memorex Telex Japan Limited and MCC. Through this linkage, we are able to add to our capabilities and effectively draw upon expertise in the field of product development, manufacturing automation, and quality control systems, to quickly respond to customer needs.

MTI can compete on a global basis in the field of computer storage and communication systems through its relationship with the Memorex Telex Group. This assures complete compatibility of our media products to hardware... both now and in the future.

MTI continues to provide not only storage media products but also new products in computer supplies and office systems to satisfy customers' needs.

MEMOREX MAGNETIC STORAGE PRODUCTS

ENTHUSIASTIC PURSUIT OF HIGH QUALITY PRODUCTS

Stringent process control for consistent quality

Quality assurance in all production processes

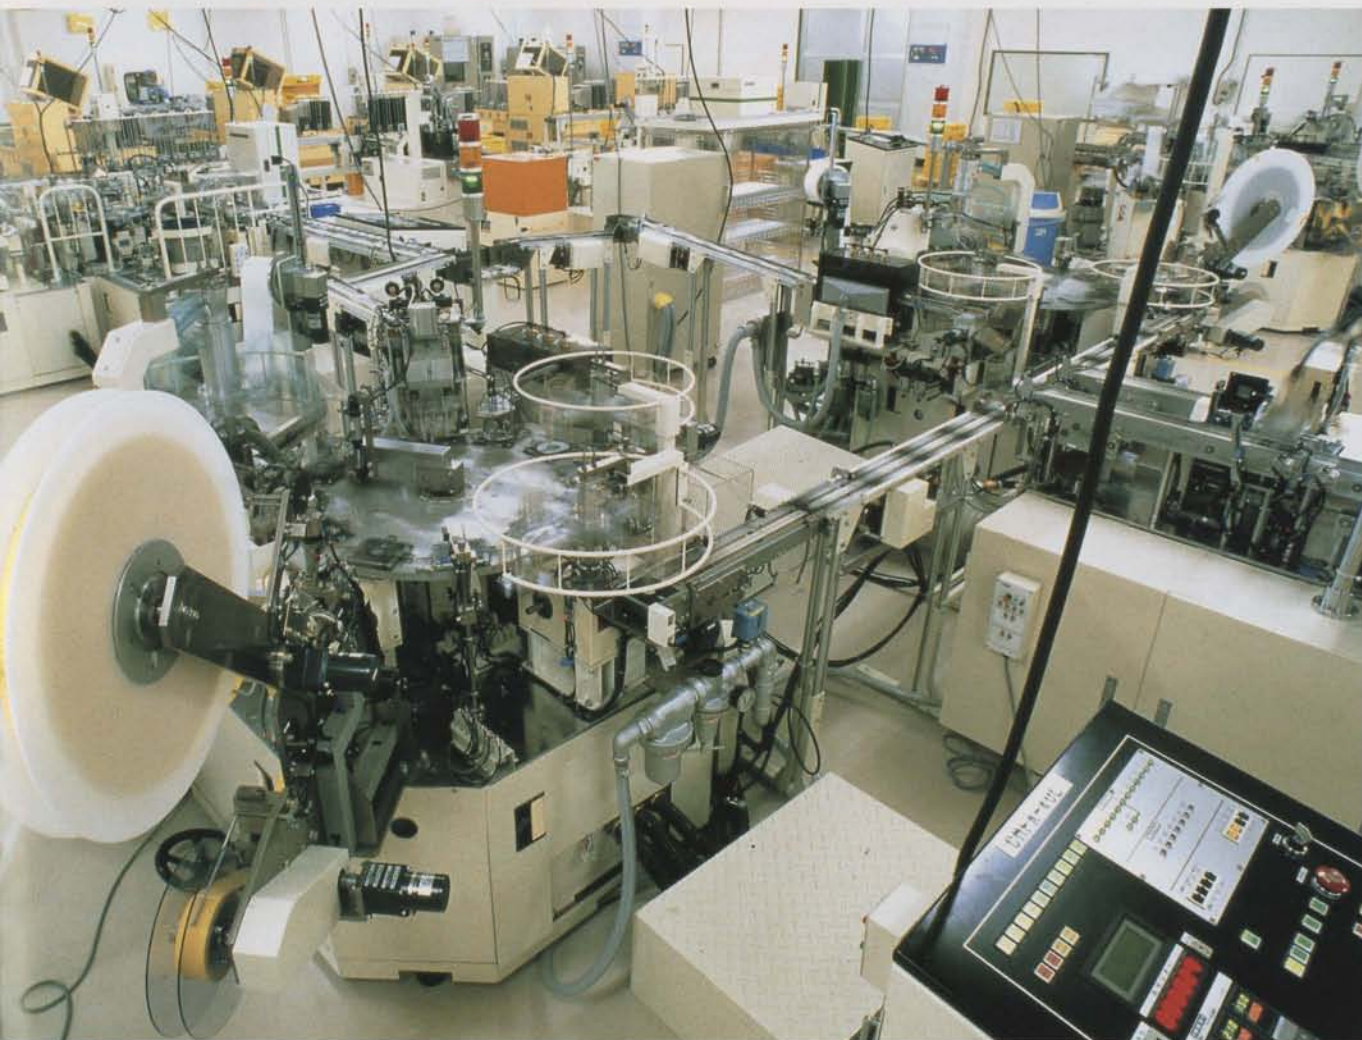

100% certification

CUSTOMER SATISFACTION GUARANTEED

Commitment to ultimate customer satisfaction is not just a company philosophy ... it is a commitment by all employees. As a team, MTI strives to provide the best quality products and relentlessly pursues total customer satisfaction.

To achieve this goal, MTI has established sophisticated quality control systems, implemented process automation, and invested in advanced technology equipment. Most importantly, MTI employees are committed to this goal.

Through this combined effort, MTI produces superior quality products and guarantees customer satisfaction.

Automated manufacturing
