

## **Memorex Adds Disk to IBM 370**

*SANTA CLARA, Calif.* - *Memorex* Corp. last week disclosed it had installed its Model 3660 disk file with two IBM System/370s, including the first one of that line installed at Zayre Department store, Framingham, Mass. The other customer was not named.

Price was not given, but the Memorex system is believed to sell for around \$200,000 and lease for \$4,000 a month. The Memorex disk is equivalent to the IBM 2314, and the installation is believed to be the first of a "foreign" disk to the IBM 370.

The 370/155 was installed at Zayre in early February.
