### Memorex Corporation-Quality, Value, Service

Founded in 1961, Memorex employs nearly 8,000 highly skilled people in more than 100 locations throughout the world. With modern headquarters and major manufacturing facilities in Santa Clara, California. Memorex also has production facilities in Liege. Belgium; Nogales, Mexico; Eau Claire, Wisconsin; and Irvine. Santa Ana, and Anaheim. California, plus a network of regional warehousing and distribution centers.

Memorex is a worldwide supplier of high technology equipment and magnetic recording media used in data storage, retrieval and communications. The growing line of products today includes high-quality disc, tape and semiconductor data storage systems; telecommunications processors and terminals; computer tape, disc packs and data modules; audio and video tapes; word processing supplies; and field engineering and facilities manage-ment services.

4 1977 MEMOREX CORPORATION WPD 919-0 AA 009-0 12/77 PRINTED IN U.S.A

Today, Memorex is the Largest Independent Manufacturer of Magnetic Recording Media in the World.

From its beginning, Memorex has continually demonstrated an ability to anticipate and respond to changing markets with innovative, high-quality products. Among these is a full line of high-technology computer products which include computer tapes, disc packs, disc cartridges, data modules and flexible discs. In addition, Memorex manufactures computer peripheral equipment such as tape and disc drives, controllers and display terminals. Memorex has also extended its capabilities and technologies into related information storage and communication areas with a complete range of audio and video tape products for consumer and professional use. And, most logically, into the world of word processing.

### We Know How to Make Better Word Processing Products. And We Do.

Nowhere is the evidence of innovative technologies more apparent than in the expanding word processing equipment market. It is, however, an industry where the efficiency of the equipment—and your office—depends upon the compatibility, reliability and value of media supplies. It is an industry Memorex serves by offering a complete line of high-quality supplies for a broad range of applications from dictation, typing and text editing to duplication, information storage and file maintenance. Memorex has been the leading independent manufacturer of computer media for over 15 years. We apply the same advanced coating and formulation technology with stringent quality control standards to produce our word processing products. This means we can offer you word processing magnetic products-magnetic cards, flexible discs and word processing and dictation cassettes-of deservedly superior reputation. These same manufacturing and technical capabilities insure that our toners, developers and typewriter ribbons deliver equally high levels of performance.

All Memorex word processing products are manufactured to be 100-percent compatible with the equipment and people that use them. Our products are tailored for use with a wide range of IBM and Xerox equipment and other machines. In addition to the company's concern for machine compatibility and effective human communication, the Memorex products are also designed for clean and efficient handling. From our magnetic cards, packaged in attractive boxes (which double as desk files for easy card identification and storage) to toners in "human-engineered" bottles that fit the user's hand and minimize spills and clouding.

Excellence. It is a concept of quality, value and convenience. Whether you copy it, type it, dictate it or store it, you are going to get consistent product integrity with Memorex—the only quality alternative.

Fundamental to the developer's long life and reliability is the beads' plastic coating. Our patented coating formulation results in the most durable developer in the industry. You will get up to 50 percent more copies, make fewer developer changes and receive greater value with Memorex.

Memorex is a registered trademark of Memorex Corporation in the U.S. Patent and Trademark Office, and in many other countries.

1977 MEMOREX CORPORATION

# Memorex Toners. For Clearer Copies, Sharper Performance.

Memorex toners deliver copies that are sharp, clean, easy to read and economical-and there are many reasons why. Our products' consistent performance is assured because at each step of manufacturing, sophisticated control procedures monitor quality. After production, each toner is stringently tested and retested at various control stations. At one station, for example, toner samples undergo the close scrutiny of a Coulter Counter, a meticulous device that measures particle size and distribution. With the Counter, we can assure that each product container is filled with toner particles of optimum size—and uniformity. The result? Better image contrast, cleaner background and a cleaner machine. Additionally, you will receive consistently better value because Memorex toners offer excellent consumption rates (more copies per carton of toner).

Memorex toner formulations (so unique we have patented some!) were developed for use with specific equipment to guarantee 100-percent compatibility and to provide copies with darker, sharper images and uniform copy quality. We then further this efficiency factor by testing each product on compatible copier machines, thus, product excellence is guaranteed in each toner, before it ever reaches the customer.

User convenience and efficiency are also assured. Because the Memorex toners adhere so completely to the paper, copies are not only clean but they do not smear when circuated and handled by any number of people. This means you can count on crisp, readable copies and clean hands with Memorex toners.

One of our most popular configurations utilizes a unique toner bottle which contours to the operator's hand for easier handling and application—the toner pours evenly and smoothly. This means faster, cleaner refills and happier users.

Guaranteed Reliability. Greater Value. 100-percent Xerox and IBM Equipment Compatibility. Compatibility With People. Uniform Copy Quality: Blacker Images and Sharper Characters.

## Memorex Developers. You Get Better Copy Quality, More Readability, Greater Value.

Our developers are a blend of Memorex toner and plastic coated beads of sand or steel which "carry" the toner in the copying process. Both the developer and toner must work in harmony for the highest quality copy reproduction. And both must interact efficiently to get good copies and economy of operation. We also monitor the size of the beads for uniform consistency because oversized developer beads could contribute to poor copier performance and copy quality. Consistent bead size is added assurance that your copier will run smoothly and experience less downtime.

Memorex has developed each toner and developer to be used with a specific IBM or Xerox copy machine. This assures you of total equipment compatibility. And when you combine our toner with the durability and compatibility of Memorex developer, you receive more clear, crisp copies per carton of developer.

Cost Savings. Longer Usable Life. Consistent Performance. Less Machine Downtime. More Copies Per Carton. 100-percent Machine Compatibility.

# Memorex -- The only quality alternative.

## Memorex Typewriter Ribbons. For Clearer Impressions.

The impression begins on the page, whether you use a Memorex film or fabric ribbon. Our film ribbons feature a high carbon content for *characters that are uniformly dark and dense*, yet provide *resistance to smearing and smudging*. And a superior binder system assures

fabric ribbon with a high ink-release

formula assures you of a print that is

clean and consistent, from image to

image.

you of a *cleaner machine!* The Memorex

Memorex ribbons make an impression on the user, too. Formulated to last, our ribbons can be stored under proper conditions for several years. After this time they still yield the same sharply defined edges and characters. Engineered for people, all Memorex ribbons provide fast, *clean, efficient handling and changing.* From the secure packaging that prevents unwinding, to cross hatching which signals the ribbon's end. Memorex offers multi- and single-strike carbon ribbons as well as a nylon fabric ribbon for a wide range of typewriters and applications.

Dark, Dense Characters. Cleaner Typewriter. Consistently Crisp Images. Clean, Efficient Handling. 100-percent Compatibility with Your Typewriter. And You.

# Memorex Dictation Cassettes. Quality Sound And Sound Business Sense.

Memorex is no stranger to the audio tape business. Our reel-to-reel, eight-track and cassette audio tape products are known for quality the world over. The standards used to produce and test those products are just as much in evidence in the Memorex dictation cassettes to guarantee you the *best performance possible*.

The ultrasonic case welding prevents our cassettes from warping, a major cause of machine jams. That means *superior day-in/day-out performance*. Available in both 60- and 90-minute recording packages, these cassettes are designed for use on dictation equipment using standard cassettes.

As with all Memorex word processing products, our dictation cassettes are designed for people. An oversized viewing window lets you know, at a glance, exactly how far the tape has wound. Our exclusive storage album gives the cassette maximum protection of recordings when not in use. And because our cassettes are leaderless, no dictation time—or material—is ever lost.

To complement the line of cassettes is the company's 3-inch dictation belt. The product offers you the same quality of sound reproduction as do the dictation cassettes. *Quality that makes sound business sense.* 

Guaranteed Reliability. No Lost Dictation Time. Superior Day-in/Day-out Performance. Human Engineered.

recording. Additionally, these cassettes offer Memorex's patented hubs which prevent tape slippage under heavy stress loads, so your tape performs smoothly, use after use. And the cassettes' uniform pressure pad assures optimal read/write capability (head-to-tape contact) by applying uniform pressure across the tape during operation. Thus, the possibility of read/write errors is minimized.

# Memorex Magnetic Cards. Unequaled Quality and Unbeatable Value.

Magnetic cards are a product of our expertise in computer media. Our advanced oxide coating technology assures you of the highest possible recording quality. That means *no information loss and absolute dependability*. This same quality and dependability is also available in double-sided magnetic cards.

Memorex has designed attractive packaging for ease of storage and card identification. Single-sided magnetic cards are provided with both writable (for easy labeling and card identification) and non-writable surfaces. All double-sided cards are made with writable surfaces on both sides. *User convenience and efficiency* is also the primary packaging consideration, whether it's our economical 50-card dispenser pack or our 25-card desktop filing pack, which includes file folders.

## Memorex Word Processing Cassettes. Flawless Performance and Reliability.

Meeting the same high-performance standards as our magnetic media are our word processing cassettes. Each cassette features 100-percent testing to insure that the tape gives you *error-free recording*. The Memorex cassette case has been precision designed to provide dependable recording protection. Plus, the case is molded of 100-percent Delrin\*, the smoothest and toughest plastic for durability and wearability.

The broad line of Memorex word processing cassettes is made for use on most word processing systems in the industry; and they are guaranteed 100-percent compatible.

Guaranteed Reliability. Smooth Performance. Durability for Longer Life and Better Value. 100-percent Machine Compatibility.

"A registered trademark of Dupont.

Guaranteed Reliability. No Information Loss. 100-percent Equipment Compatibility. Convenient and Efficient Filing. Easy Storage and Identification.

# Memorex -- The only quality alternative.

## Memorex Flexible Discs. For the Latest Generation of Text Editing and Data Storage Equipment.

The family of Markette flexible discs shows, once again, how Memorex has applied its expertise in magnetic media to daily office operations. Our proprietary oxide coating formulation and surface finishing techniques have resulted in disc products which offer maximum durability and minimum wear of the disc and your equipment.

The Markette disc jacket has a speciallydesigned inner lining which cleans and cushions the disc during operation. This inner lining assures reduced error potential and increases data reliability.

Our single- and dual-sided IBM compatible Markette discs are designed for use on Lexitron, Digital Equipment Corporation, Linolex, Lanier units and Display Text's Editor. (Memorex also offers specially formatted single-sided Markettes for System/6.) Each flexible disc is tested error free from Memorex.

The 32 hard sector disc is designed specifically for use on Wang's WP-10, WP-20 and WP-30 systems.

Memorex's FD IV and FD VI Markette discs can be used on the NBI System, on Vydec's 1146, 1200 and 1400 systems, plus, the Wang Programmable Calculator.

Both FD IV and FD VI feature hub reinforcing rings to protect against hub damage and to reduce wear deposits which may migrate onto the disc causing errors. Additionally the FD IV has a special jacket designed for high-temperature applications.

Performance, cost efficiency and convenience-from the manufacturing that insures maximum durability and reduced error potential to the packaging that both protects the disc and facilitates human handling—Markette discs more than meet your needs.

Guaranteed Reliability. Computer Tape Technology. 100-percent Equipment and Human Compatibility.
