

Memorex introduces the Mark VI.

The Mark VI is a new 20-surface disc pack built to the same exacting standards as the Memorex Mark I.

The Mark VI is fully compatible with the IBM 2314 drive, as well as the new Memorex 660 drive.

In addition, all Mark VI packs are initialized be-

fore shipment, with the home addresses and record zeros (this to save you time and trouble and permit immediate VOL and VTOC assignments).

Mark VI has been extensively field-tested and is now being delivered in production quantities.

Call your man from Memorex in any of our 50 factory sales/service offices or write: Memorex, Memorex Park, Santa Clara, California 95050.
